NIH Transformative Research Awards Offered

Patient Services Collaborative Grant Program Announced

Recording of CCTST Regulatory Forum Available

New Patient Services Collaborative Grant Program

Applications will be accepted and reviewed on a continuing basis. Proposals will be required to be responsive to the following program goals:

- To stimulate collaborative, interdisciplinary research projects across departments of Cincinnati Children’s Hospital Medical Center (CCHMC)
- To involve researchers from all divisions, departments, and centers of CCHMC
- To foster new research directions, and to facilitate the discovery of innovative solutions to the care of children
- To enhance the translation of innovations into clinical practice

Maximum allowable budget (direct costs) is $100,000, with a minimum of $10,000 from each research partner. The successful project will receive up to $50,000 of support per year for direct costs per project.

At least one collaborator from other divisions, departments, and centers of CCHMC is required. The proposal must include a full application by 30 days.

For more information, visit the CCTST website or contact Rita Pickler, PhD, at pickler@uc.edu or 513-558-1922.

The CCTST is now accepting applications from junior faculty. Strategies for overcoming difficulties in publishing outcomes for children and their families. Applications are due by 12 noon Friday, November 1, 2013.

The NIH Transformative Research Awards is designed to stimulate collaborative, interdisciplinary research projects across the divisions, departments, and centers of CCHMC. The goal of the NIH Transformative Research Awards is to foster new research directions, and to facilitate the discovery of innovative solutions to the care of children. The awards will support up to 12 months of investigation each year. The approved projects will have a major impact in a broad area of biomedical or behavioral research and will have the potential to create or overturn fundamental scientific paradigms. The proposals must have the potential to create or overturn fundamental scientific paradigms.

The approval process for the protocol must be completed before it can be submitted. The project must be responsive to the following program goals:

- To provide resources, including training and support, for the research on critical or innovative ideas.
- To provide funding for the research on critical or innovative ideas.
- To provide resources, including training and support, for the research on critical or innovative ideas.
- To provide funding for the research on critical or innovative ideas.

To be considered transformative, projects must have the potential to create or overturn fundamental scientific paradigms. The proposals must be submitted by 12 noon Friday, November 1, 2013.
