- Design Thinking Research Awards LOI Due Aug. 1
- CCTST Grand Rounds July 18

CCTST Grand Rounds, July 18

For many biomedical grant competitions, completion of a letter of intent (LOI) that determines whether you submit a full application is strongly encouraged. A letter of intent is not required. Full applications must be received no later than 5 PM, Friday, August 1, 2014.

Offered for the first time and open to all faculty, the sessions will be led by Bruce Trapnell, MD and Frank Schapira, MD, MPH. CCTST Grand Rounds sessions provide opportunities for faculty to learn about emerging research trends and hot topics in translational science.

For more information, see the CCTST website or contact us.

Design Thinking LOI Due August 1

Investigators who email Gail Jarvik, MD, PhD, head of the CCTST Research and Development team will utilize design thinking tools and a "co-creation" approach to develop products or services with a focus on innovation to take products from the laboratory to the marketplace.

This grant opportunity provides partial support for a student (PhD, MD, etc.) and a team (at least 2 faculty members) to conduct the work. The maximum allowable grant is $10,000 in support for service. We now have over 1300 faculty members (and counting!) representing all schools and colleges at University of Cincinnati. The applicant's department/division or grant funds from other sources must include participant or community stakeholders in addition to the student and the team.

The next Letter of Intent (LOI) deadline is Friday, August 1 by 5 PM. Invited final applications are due September 12 and awards will be made by October 17, 2014. The maximum allowable grant is $10,000 in support for service. Collaborations between CCTST members (and counting!), the College of Medicine and the Dean of the College of Nursing will be strongly encouraged. Projects must focus on improving healthcare systems or on health disparities, 2 of the 3351 UC MSB.

Gail Jarvik, MD, PhD
Program Director, CCTST

Don't Stop Believin’

"What does the CCTST do?"

The CCTST Grand Rounds is one of the CCTST’s signature events. Each month the CCTST Grand Rounds brings together members and faculty to learn about emerging research trends and hot topics in translational science.

The CCTST Grand Rounds have given faculty the opportunity to learn about groundbreaking research from researchers across many disciplines. The CCTST Grand Rounds have also provided a forum for faculty to engage with opportunities for research and training.

The CCTST Members represented 2005-2013.

About us

The University of Cincinnati Academic Health Center, with the University of Cincinnati Health System (UCHS), provides leadership in education, patient care, research, and community service. The University of Cincinnati Academic Health Center includes the University of Cincinnati Medical Center, UC Medical Center, Children’s Hospital of Cincinnati, the University of Cincinnati College of Medicine, and the University of Cincinnati College of Nursing.

The University of Cincinnati Academic Health Center, with the University of Cincinnati Health System (UCHS), provides leadership in education, patient care, research, and community service. The University of Cincinnati Academic Health Center includes the University of Cincinnati Medical Center, UC Medical Center, Children’s Hospital of Cincinnati, the University of Cincinnati College of Medicine, and the University of Cincinnati College of Nursing.

The Center for Clinical & Translational Science & Training (CCTST) is an NINR Clinical and Translational Science Award (CTSA) grant (1UL1NR000030). The CCTST is a national leader in supporting investigator-initiated research and training in translational science to improve health in the community. The CCTST acts as a clearinghouse for grants, provides guidance, information, support, and training to researchers and patients, and promotes the training and mentorship of underrepresented minorities.

What does the CCTST do?

- Provides methodologic support for investigators
- Supports collaborative, interdisciplinary teams
- Provides seed money for pilot studies and other funding opportunities
- Provides training and mentorship to researchers
- Maintains an online clearinghouse for information on funding opportunities
- Provides guidance, information, support, and training to researchers and patients
- Promotes the training and mentorship of underrepresented minorities

New Opportunities: Effective Communication and Ethics in Research

The Center for Clinical & Translational Science & Training (CCTST) is committed to promoting effective communication and ethical research. The CCTST has developed new opportunities to support these important initiatives.

The annual Human Subject Protection Conference (HSPPC) is one of the CCTST’s signature events. Each year, the conference brings together members and faculty to learn about emerging research trends and hot topics in translational science.

The conference has given faculty the opportunity to learn about groundbreaking research from researchers across many disciplines. The HSPPC has also provided a forum for faculty to engage with opportunities for research and training.
