“Vitamin D Deficiency in Children and Adolescents: What’s New?”

We’re kicking off 2017 with one of the hottest of Nutrition topics, Vitamin D. This talk will review recent studies and the data that has informed national vitamin D guidelines. At the end of the seminar, attendees will know how clinicians identify pediatric patients who are at risk for vitamin D deficiency, and how to outline a plan regarding both vitamin D supplementation and treatment.

Catherine M. Gordon, MD, MS
Director, Division of Adolescent/Transition Medicine
Cincinnati Children’s Hospital Medical Center
Professor of Pediatrics, University of Cincinnati
College of Medicine
