RPAC and WE C

Researchers interested in improving how community research is done, as well as using Community science and process, to effective community research methods. The following are brief updates about their work.

Feedback about the Discover Together Biobank

The CCTST and WE C are resources for ALL in the AHC research community. Their first review and next one is on its way; please contact them with any feedback you have.

The CCTST

The CCTST offers grants of up to $20,000 for translational research project. The funding period is limited to one year with a budget of $60,000. The maximum allowable budget is $60,000.

Innovative Core Grant (ICG)

Designed to develop methods to overcome obstacles to clinical and translational research. Supports projects by established principal investigators, or by new/early stage investigators mentored by established investigators, and also promotes the development of new/early stage investigators.

Applications are invited from qualified proposals in any area of medicine, basic health sciences, or health related fields. There is no particular emphasis on any area of medical research or health sciences. Applications are due on 11/15/18. The Just in Time (JIT) application process is designed to quickly and efficiently facilitate the submission of a new or revised application for extramural funding. JIT awardees by 11/15/18. The Just in Time (JIT) application process is designed to quickly and efficiently facilitate the submission of a new or revised application for extramural funding. JIT awardees by 11/15/18. The Just in Time (JIT) application process is designed to quickly and efficiently facilitate the submission of a new or revised application for extramural funding. JIT awardees by 11/15/18. The Just in Time (JIT) application process is designed to quickly and efficiently facilitate the submission of a new or revised application for extramural funding.

Pilot Update

Screener

Examples of previous awards have included funding for research designed to improve community research processes, as well as access to the REDCap database. The pilot core facilities to obtain critical preliminary data for new or revised extramural applications. We anticipate that we will begin assigning reviewers to abstracts at the end of November and invite those interested to review a draft of the pilot grant application guidelines. During the past year, we have reviewed 10 applications. We anticipate that we will begin assigning reviewers to abstracts at the end of November and invite those interested to review a draft of the pilot grant application guidelines. During the past year, we have reviewed 10 applications. We anticipate that we will begin assigning reviewers to abstracts at the end of November and invite those interested to review a draft of the pilot grant application guidelines. During the past year, we have reviewed 10 applications. We anticipate that we will begin assigning reviewers to abstracts at the end of November and invite those interested to review a draft of the pilot grant application guidelines. During the past year, we have reviewed 10 applications. We anticipate that we will begin assigning reviewers to abstracts at the end of November and invite those interested to review a draft of the pilot grant application guidelines. During the past year, we have reviewed 10 applications. We anticipate that we will begin assigning reviewers to abstracts at the end of November and invite those interested to review a draft of the pilot grant application guidelines. During the past year, we have reviewed 10 applications.
