“Neighborhood food and activity environments: Relationships to child weight status and related behaviors”

This presentation will explore the current methods and evidence about how the neighborhood food and activity environments in which children live may impact their weight status, eating, and activity behaviors.

Brian Saelens, PhD

Professor, Pediatrics
Psychiatry and Behavioral Sciences
Seattle Children’s Research Institute
University of Washington

Date: Friday, May 11, 2018
Time: Noon – 1pm
Location: S1.203 (Children’s Hospital)

Lunch will be available for attendees.

The seminar is eligible for 1 CEU for dietitians, diet techs, and other health professionals

This event is supported by an unrestricted educational grant from Mead Johnson Nutrition
