Enabling the Choice (Not) to Receive Medically Actionable Genomic Research Results

Christian Simon, MA, PhD

Associate Professor, Department of Internal Medicine
Program in Bioethics and Medical Humanities
Roy J. and Lucille A. Carver School of Medicine
University of Iowa

Objectives: Improve awareness of the growing push to enable optional access to medically actionable genomic research results. Achieve a concrete and reflective understanding of the implications of this push for clinician-investigators and patient-participants.

Registration not required. For more information, go to cctst.uc.edu
